

Future & Emerging Technology 1

- Topics of discussion
 - semantic web technologies
 - immersive audio-visual services (3D television, mobile 3D)
- Current and potential cooperation
 - research theme: multilingual semantic web technologies
 - partners from the EU: DERI, University of Trento
 - partners from Korea: Seoul National University, SaltLux
 - ongoing cooperation: “International Collaboration for Linking Academia and Industry” between DERI and SaltLux

Future & Emerging Technology 2

- Topics of discussion
 - massive distributed reasoning
 - cognitive radio and future networks
 - future services for sharing of immersive video content
 - advanced photonic integrated circuits and components
- Current and potential cooperation
 - already ongoing cooperation between the EU-funded LarKC project and SaltLux
 - potential for exchange of students and visiting researchers (EASE)
 - interest for continued/future cooperation in the domain of immersive multimedia services with a semantic dimension
